product catalogue

TABLE OF CONTENTS

NUMBER 1

The result of the survey conducted among veterinarians in Poland unequivocally confirmed Vet Expert's No. 1 position as the undisputed leader in veterinary nutraceuticals.

GLOBAL NETWORK

Our brands - Vet Expert and RAW PALEO are known and appreciated on 4 continents, in over 45 countries around the world and this number is constantly growing.

INNOVATION

As the first ones in the world, we adapted Twist-Off technology among veterinary products for pets.

NON-PROFIT

We support animal-oriented foundations and organizations that look after defenseless and harmed animals.

RESEARCH AND DEVELOPMENT

Our R&D department runs unique projects that shape the future of veterinary medicine. We constantly push the limits and introduce new solutions.

VET EXPERT ACADEMY

Personal growth is very important for every veterinarian. That's why we created our own platform gathering the best key opinion leaders, so everyone in veterinary industry can learn and provide the best service possible.

Name	ARTHROVET COLLAGEN	ARTHROVET
Species		
Indications	The product is recommended for dogs and cats to support the maintenance of optimal functioning of articular cartilages and joints. It is indicated for both young, growing as well as older animals.	The product is intended for dogs and cats to maintain the proper function of articular cartilages and joints. Recommended for both young animals in the intensive growth period as well as older animals.
Strength	●●○○○	●●●○○
Form		
Composition	collagen 2500 mg	glucosamine 350 mg, chondroitin 100 mg vitamin C 25 mg, hyaluronic acid 7 mg
Key ingredients	Collagen included in the preparation has a positive effect on the health and metabolism of joint cartilage. Supports the growth of cartilage, muscles and joints.	Glucosamine - necessary for the production of glycosaminoglycans, which form the structural basis for the extracellular matrix of articular cartilages. Chondroitin - used by articular cartilages to produce the extracellular matrix. Ensures the proper hydration of articular cartilages, guaranteeing their resilience and elasticity. Hyaluronic acid - beneficial for animals with joint and bone issues such as osteoarthritis. Hyaluronic acid reduces inflammation and pain in the joints, improves joint mobility, and slows down the progression of joint degeneration.
Daily dosage	1 sachet / 20 kg b.w.	1 tablet / 20 kg b.w.
Packaging	60 sachets	60 / 90 tablets

Name	ARTHROVET COMPLEX	ARTHROVET COMPLEX SMALL BREED	Name
Species			Species
Indications	The product for dogs and cats supporting proper functioning of the articular cartilages and joints. Indicated especially for: - the elderly animals to support joint mobility, health and regeneration of joint cartilage, - young animals during intensive growth to optimize joint development and ensure long-term protection of joint cartilage, - animals with increased physical activity to have a positive effect on excessively loaded joints, tendons and ligaments.	The product is intended for cats and small breed dogs to maintain the proper function of articular cartilage and joints. Recommended for both young, growing animals and older animals.	Indications
Strength	●●●○○		Strength
Form			Form
Composition	Glucosamine from animal tissues 300 mg, dried avocado <i>Persea americana</i> Mill. 145 mg, soybean seeds <i>Glycine max.</i> L. Merr. 145 mg, L-carnitine L-tartrate 44.2 mg, chondroitin sulfate 30 mg, vitamin C 25 mg, devil's claw extract <i>Harpagophytum procumbens</i> 10 mg, sodium hyaluronate 7 mg, manganese (II) oxide 1.7 mg, zinc oxide 1.2 mg.	Glucosamine from animal tissues 169 mg, dried avocado (<i>Persea americana</i> Mill.) 33.3 mg, devil's claw extract (<i>Harpagophytum procumbens</i>) 33.3 mg, vitamin C 25 mg, chondroitin sulfate 22.2 mg, crude lecithin 13.7 mg, sodium hyaluronate 5.5 mg, manganese sulfate monohydrate 6.2 mg, zinc oxide 1.3 mg.	Composition
Key ingredients	<p>Glucosamine and chondroitin - necessary for the synthesis of extracellular matrix which form the structural basis for articular cartilages. Ensure the proper hydration of articular cartilages, guaranteeing their resilience and elasticity.</p> <p>Harpagophytum procumbens - shows anti-inflammatory properties, due to the inhibition of the enzymes such as cyclooxygenase and lipoxygenase.</p> <p>Dry avocado, soy extract - show anabolic, anticatabolic, and anti-inflammatory effects on chondrocytes; increase collagen synthesis; inhibit the 1-beta interleukin induced collagenase; boost the synthesis of aggrecan; inhibit the IL1β-dependent activation of extracellular matrix metalloproteinases (MMP)-3, IL-6, IL-8 and prostaglandin E2 (PGE2).</p> <p>Manganese - serves as a building block of enzyme molecules known as glycosyltransferases, necessary for the synthesis of proteoglycans that ensure healthy bones and cartilages.</p>		Key ingredients
Daily dosage	1 tablet / 20 kg b.w.	1 capsule / 5 kg b.w.	Daily dosage
Packaging	60 / 90 tablets	60 Twist Off capsules	Packaging

Name	ARTHROVET ULTRA
Species	
Indications	The product is recommended for dogs and cats to support the metabolism of joints in the case of osteoarthritis.
Strength	●●●●●
Form	
Composition	Antarctic krill oil 200 mg, micronized palmitoylethanolamide 101 mg, glucosamine 50 mg, undenatured type II collagen (UC II*) 40 mg, vitamin E 13,34 mg
Key ingredients	<p>Undenatured type II collagen (UC-II) is a specific form of type II collagen that has retained its natural three-dimensional structure. This collagen is a key component of articular cartilage, responsible for its elasticity and strength.</p> <p>Glucosamine is an amino sugar found in articular cartilage, supporting the synthesis of collagen and glycosaminoglycans that build it.</p> <p>mPEA (micronized palmitoylethanolamide), a component of synovial fluid and in combination with other ingredients improve the mobility and flexibility of joints.</p> <p>Antarctic krill oil (<i>Euphausia superba</i>) is a highly bioavailable source of omega-3 polyunsaturated fatty acids, EPA and DHA.</p> <p>Vitamin E stabilizes the polyunsaturated fatty acids EPA and DHA, preventing their oxidation.</p>
Daily dosage	1 capsule daily. Recommended length of time: initially up to 3 months.
Packaging	30 twist off capsules

THE INGREDIENTS CONTAINED IN ARTHROVET ULTRA SUPPORT KEY PROCESSES ASSOCIATED WITH THE PROPER FUNCTIONING OF JOINTS:

1. PROCESSES WITHIN THE JOINTS

- **Omega-3 fatty acids (EPA, DHA) from krill oil** – support the maintenance of the proper balance of physiological processes within the joints.
- **mPEA** – controls excessive activation of immune cells.

2. PAIN

- **mPEA** – supports physiological mechanisms maintaining mobility comfort.

3. PROTECTION OF CARTILAGE AND THE SYNOVIAL MEMBRANE

- **UC-II®** – maintains the integrity of articular cartilage and the immune response within the joint.
- **Astaxanthin from krill oil** – exhibits antioxidant properties supporting the protection of cartilage matrix components.
- **Glucosamine** – supports the physiological synthesis of glycosaminoglycans.
- **Omega-3 from krill oil** – supports the synovial membrane by maintaining the balance of inflammatory processes within the joint.

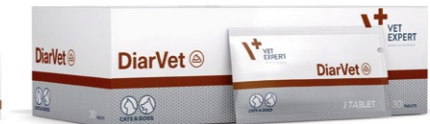

4. LONG-TERM JOINT MOTILITY

- **UC-II®** – supports the maintenance of flexibility and a proper range of motion.
- **Omega-3 from krill oil** – supports joint mobility.

Name	HEPATIALE FORTE SMALL BREED AND CATS	HEPATIALE FORTE	HEPATIALE FORTE LARGE BREED
Species			
Indications	A supplement intended for dogs and cats, or large breed dogs, to support proper liver function. Hepaticale Forte is available in 3 formulations tailored to the size of the animal - for small breed dogs and cats, medium breed dogs, and large and giant breeds.		
Strength	●●●○○		
Form			
Composition	Crude lecithin 110 mg, L-arginine 42 mg, L-glutamine 42 mg.	Lecithin from soybean seeds <i>Glycine max.</i> (L.) Merr. standardized for phospholipids 150 mg, L-arginine 75 mg, L-glutamine 75 mg.	Lecithin from soybean seeds <i>Glycine max.</i> (L.) Merr., standardized for phospholipids 275 mg, L-arginine 225 mg, L-glutamine 225 mg.
Key ingredients	<p>Arginine – an essential amino acid in liver metabolism, acting as a precursor of ornithine; it plays a role in the conversion of nitrogen and ammonia in the urea cycle.</p> <p>Glutamine – an amino acid involved in supplying substrates for gluconeogenesis; a precursor of ornithine; it aids in the process of ammonia removal from the body.</p> <p>Phospholipids sourced from soy lecithin, have a protective effect on hepatocytes and support liver regeneration processes.</p>		
Daily dosage	Cats - 1 capsule Dogs - 1 capsule / 5 kg b.w.	Cats & dogs - 1 tablet / 15 kg b.w.	Large breed dogs - 1 tablet / 25 kg b.w.
Packaging	40 Twist Off capsules	40 tablets	40 tablets

HEPATIALE FORTE LIQUID	HEPATIALE FORTE ADVANCED	Name
		Species
The product for dogs supporting the proper functioning of the liver, liquid form - convenient for administration.	Product intended for dogs and cats to support proper liver function.	Indications
●●●●○	●●●●●	Strength
		Form
Milk thistle 40,000 mg, artichoke 10,000 mg, L-carnitine 3,500 mg, choline chloride 3,000 mg, anhydrous betaine 2,500 mg, vitamin B2 1,000 mg, vitamin B6 750 mg. * The provided composition is for 1 l of the product.	L-arginine 75 mg, L-glutamine 75 mg, soybean seeds <i>Glycine max.</i> (L.) Merr. 70 mg, anhydrous betaine 70 mg, milk thistle extract <i>Silybum marianum</i> (L.) Gaertn. 50 mg, zinc oxide 0.4 mg.	Composition
<p>L-carnitine – an amino acid involved in the body's energy processes, playing an important role in the transport of fatty acids to the mitochondria, where oxidation and energy production occur.</p> <p>Choline chloride – a natural source of choline in the body; it participates in the synthesis of cell membranes, neurotransmitters, and lipid metabolism.</p> <p>Betaine – a derivative of glycine and acts as a methyl group donor, participating in the synthesis of SAM (S-adenosylmethionine), supporting protection against free radicals, and possessing antioxidant properties.</p> <p>B vitamins – support the metabolic processes occurring in the liver. Their addition is particularly important in cases of impaired organ function.</p> <p>Milk thistle extract (<i>Silybum marianum</i> (L.) Gaertn.) – contains silymarin; it has protective, antioxidant, and stabilizing properties for hepatocyte function and promotes high concentrations of glutathione in liver cells as well as the synthesis of DNA and RNA.</p>	<p>In addition to arginine, glutamine, and lecithin, it contains betaine, which, as a methyl group donor, participates in the synthesis of S-adenosylmethionine (SAM), a potent antioxidant that increases glutathione concentration; it helps protect cells against free radical damage.</p> <p>Milk thistle extract (<i>Silybum marianum</i> (L.) Gaertn.) – contains silymarin; it has protective, antioxidant, and stabilizing properties for hepatocyte function and promotes high concentrations of glutathione in liver cells as well as the synthesis of DNA and RNA.</p> <p>Zinc is a component of enzymes essential for proper liver function, supports glucose and fat metabolism, and has hepatoprotective and antioxidant properties.</p>	Key ingredients
5 ml / 10 kg b.w.	Cats & dogs up to 10kg b.w. – 1 tablet every other day Dogs > 10 kg b.w. – 1 tablet / 10 kg b.w.	Daily dosage

Name	BIOPROTECT	BIOPROTECT PASTE	BIOPROTECT ULTRA
Species			
Indications	The product is recommended for dogs and cats to support proper gastrointestinal microbiota function.	The product for dogs and cats supplementing energy, electrolytes, supporting digestion. Contains microorganisms that are a natural component of the gastrointestinal microbiota of dogs and cats. It can be administered adjunctively in diarrhea of various backgrounds.	The preparation is intended for dogs to help restore the balance of the intestinal microbiome and the proper functioning of the intestinal barrier in the case of gastrointestinal dysbiosis. Use as a long-term support in cases of abnormal functioning of the digestive tract, in particular pancreas and enteropathies due to various causes. It can be used on dogs of all ages, including puppies, adult dogs and seniors.
Form			
Composition	live bacterial cultures 5x10 ⁹ CFU/g (<i>Enterococcus faecium</i> , <i>Lactobacillus acidophilus</i>), mannan-oligosaccharides 100 mg, fructo-oligosaccharides 100 mg	Bentonite 345 g, <i>Enterococcus faecium</i> DSM10663/NCIMB 10415 550.2 x 10 ⁹ CFU, fructooligosaccharides 30 g, charcoal 20 g, sodium chloride 8.5 g, potassium chloride 2.6 g, magnesium chloride 1.7 g. *The provided composition is for 1 liter of the product.	<i>Limosilactobacillus reuteri</i> 60 mg (6 x 10 ⁹ CFU), <i>Lactobacillus acidophilus</i> 50 mg (5 x 10 ⁹ CFU), <i>Enterococcus faecium</i> 5 mg (5 x 10 ⁹ CFU), <i>Yarrowia lipolytica</i> 100 mg, galactooligosaccharides 100 mg, L-tryptophan 50 mg, microencapsulated sodium butyrate 43 mg
Key ingredients	<i>Enterococcus faecium</i>, <i>Lactobacillus acidophilus</i> – support the proper development of the gut microbiome, thereby limiting the growth of pathogenic bacteria. Fructooligosaccharides (FOS) and mannanoligosaccharides (MOS) –stimulate the development of a healthy gut microbiome, including <i>E. faecium</i> and <i>L. acidophilus</i> , and help strengthen the intestinal wall.	Bentonite – has an absorbent effect, capturing excess water and other harmful substances from the intestinal lumen. <i>Enterococcus faecium</i> – supports the proper development of the gut microbiome and limits the growth of pathogenic bacteria. Stimulates the production of short-chain fatty acids, which serve as an energy source for intestinal cells. Activated charcoal – absorbs harmful substances.	<i>Enterococcus faecium</i> and <i>Lactobacillus acidophilus</i> , supplemented with prebiotic galactooligosaccharides and postbiotic microencapsulated sodium butyrate, along with <i>Limosilactobacillus reuteri</i> , help restore balance to dysbiosis while simultaneously supporting the regeneration of enterocytes. <i>Yarrowia lipolytica</i> yeast – support the natural protective barrier of the intestines as well as digestive processes, particularly the digestion of fats. L-tryptophan – is a precursor of serotonin, supporting the gut-brain axis communication and simultaneously regulating proper gastrointestinal function. Sodium butyrate – provides energy to intestinal epithelial cells, influences the development of villi, and intestinal defense systems. Galactooligosaccharides – a nutrient for lactic acid bacteria.
Daily dosage	1-2 capsules	< 5 kg b.w. – 1 ml 2 times a day 5-10 kg b.w. – 2 ml 2 times a day 10-25 kg b.w. – 4 ml 2 times a day 25-40 kg b.w. – 6 ml 2 times a day > 40 kg b.w. – 8 ml 2 times a day	1-2 capsules, use for min. 4-8 weeks
Packaging	60 capsules	syringe 15 ml	30 capsules

DIARVET SMALL BREED & CATS	DIARVET PASTE	DIARVET TABLET	Name
			Species
The preparation is intended for cats and small dog breeds with persistent or severe diarrhea.	A paste preparation for dogs and cats designed to thicken stool; a source of easily digestible carbohydrates and prebiotics that support the natural gut microbiota; also provides supportive care for diarrhea.	The product is recommended for cats and dogs to thicken fecal masses. It can be used as a support in diarrhea.	Indications
			Form
Inulin from <i>Cichorium intybus</i> L (Chicory) 120 mg, bentonite 100 mg, dried amla fruits (<i>Embllica officinalis</i>) 10 mg, apple pectin 2 mg, vitamin A 0.24 mg, zinc 0,19 mg.	Bentonite 50,000 mg, inulin, apple fiber, vitamin A 400,000 IU, zinc 4,000 mg, tannins 5,000 mg. *The listed composition refers to 1 kg of the product.	Chicory inulin 420 mg, bentonite 534 mg, tannins 45 mg, apple pectin 9 mg, vitamin A 3 mg, zinc oxide 2 mg.	Composition
Bentonite – a natural ingredient; stabilizes intestinal pH, absorbs water, and has detoxifying properties. Chicory inulin – a prebiotic; balances the gut microbiome and helps regulate intestinal motility. Apple pectin – a water-soluble fiber with water-binding properties. Tannins – have astringent properties, reducing stool liquidity. Vitamin A – supports the regeneration of intestinal epithelial cells. Zinc oxide – has astringent properties and aids in the regeneration of intestinal epithelial cells.	Bentonite – has an absorbent effect, capturing excess water and other harmful substances from the intestinal lumen; it also has stool-thickening properties. Inulin – has a prebiotic effect and increases the number of beneficial bacteria in the digestive tract. Tannins – due to their astringent properties, create a protective layer on the surface of mucous membranes. Vitamin A – supports the function of the intestinal epithelium.	Bentonite – a natural ingredient; stabilizes intestinal pH, absorbs water, and has detoxifying properties. Chicory inulin – a prebiotic; balances the gut microbiome and helps regulate intestinal motility. Apple pectin – a water-soluble fiber with water-binding properties. Tannins – have astringent properties, reducing stool liquidity. Vitamin A – supports the regeneration of intestinal epithelial cells. Zinc oxide – has astringent properties and aids in the regeneration of intestinal epithelial cells.	Key ingredients

6 capsules / 30 capsules	syringe 15 ml	6 tablets / 30 tablets	Packaging

Name	TRICHOCAT	TRIDIGEST	COPROVET
Species			
Indications	The product is recommended for cats to prevent the formation of bezoars (hairballs) and to facilitate their removal from the digestive tract.	Product for dogs and cats supporting the digestive functions of the gastrointestinal tract. Ingredients contained in the product support the secretory functions of the pancreas and liver and the digestive functions of the stomach.	A preparation designed for dogs and cats to optimize the proper functioning of the digestive tract microbiome. It reduces the risk of coprophagia caused by improper digestion.
Form			
Composition	Refined soybean oil (<i>Glycine max.</i> (L.) Merr.), brewer's yeast, taurine 2000 mg, niacinamide (vitamin B3) 990 mg, vitamin E 750 IU, vitamin B2 400 mg. *The provided composition is for 1 kg of the product.	Betaine hydrochloride 120 mg, soybean seeds <i>Glycine max.</i> (L.) Merr. 120 mg, licorice root <i>Glycyrrhiza</i> L. 80 mg, artichoke extract <i>Cynara scolymus</i> L. 80 mg.	<i>Enterococcus faecium</i> 25 mg (2.5 x 10 ⁹ CFU), <i>Lactobacillus acidophilus</i> 25 mg (2.5 x 10 ⁹ CFU), fructooligosaccharides 100 mg, dried pineapple standardized for bromelain 100 mg, <i>Yucca schidigera</i> Roezl. 50 mg.
Key ingredients	<p>Soybean oil - facilitates the passage of content through the digestive tract and prevents the formation of hairballs.</p> <p>Yeast combined with vitamins B2 and B3 supports the motor function of intestinal cells by providing them with the necessary substances for the evacuation of hairballs.</p> <p>Taurine - is an essential exogenous amino acid for cats and supports the digestive process.</p> <p>Vitamin E - as an antioxidant, protects cells from the effects of free radicals.</p>	<p>Betaine - stimulates the secretion of gastric and pancreatic juices and supports the digestion of proteins.</p> <p>Artichoke extract (<i>Cynara scolymus</i> L.) - supports bile production.</p> <p>Licorice root (<i>Glycyrrhiza</i> L.) - aids in the secretion of pancreatic juice and the digestive process.</p> <p>Phospholipids - sourced from soy lecithin, have a protective effect on the stabilization of the hepatocyte cell membrane.</p>	<p>Bromelain - supports protein breakdown and stimulates digestive processes.</p> <p><i>Enterococcus faecium</i>, <i>Lactobacillus acidophilus</i> - support the proper development of the gut microbiota and thereby limit the growth of intestinal pathogens.</p> <p>Fructooligosaccharides (FOS) - stimulate the growth of healthy microbiota and help maintain proper intestinal pH.</p> <p><i>Yucca Schidigera</i> - contains saponins, phenols, and antioxidants; supports local intestinal immunity and helps regulate cholesterol levels.</p>
Daily dosage	2ml, 1-2 times daily	Dog - 1 tablet / 15 kg b.w. Cat - 1/2 tablet	Dogs and cats < 10 kg b.w. - 1 capsule Dogs > 10 kg b.w. - 2 capsules
Packaging	Paste 50 g / 120 g	40 tablets	30 capsules

SEMEVET	PROLACTINO	PROLACTINO LARGE BREED	Name
			Species
The product is recommended for male dogs intended for reproduction, to support the proper process of spermatogenesis and semen quality.	The product is intended for female dogs to be used during physiologically occurring pseudopregnancy.		Indications
			Form
Evening primrose extract 100 mg, vitamin E 100 mg, selenium yeast 60 mg, vitamin E 50IU	vitex (<i>Vitex agnus-castus</i> L.) 200 mg, parsley (<i>Petroselinum sativum</i>) 50 mg, dandelion (<i>Taraxacum officinale</i>) 25 mg, chestnut extract (<i>Castanea sativa</i> Mill) 20 mg	vitex (<i>Vitex agnus-castus</i> L.) 700 mg, parsley (<i>Petroselinum sativum</i>) 150 mg, dandelion (<i>Taraxacum officinale</i>) 80 mg, chestnut extract (<i>Castanea sativa</i> Mill) 80 mg	Composition
<p>Selenium - regulates the process of spermatogenesis and sperm production, and acts as an antioxidant (affecting glutathione peroxidase).</p> <p>Vitamin E - reduces the harmful effects of free radicals on the sperm cell membrane.</p> <p>Evening primrose extract - is a source of antioxidants and essential fatty acids necessary for building the sperm cell membrane; it influences semen quality.</p>	<p><i>Vitex agnus-castus</i> - supports the body in regulating prolactin levels.</p> <p>Parsley and dandelion - increase the excretion of water from the body and support urine production and metabolism.</p> <p>Chestnut - helps constrict blood vessels in the mammary gland.</p>		Key ingredients
1 tablet / 10 kg b.w. Product should be administered for at least 30 days, optimally for 60 days.	1 tablet / 5 kg b.w. (from week 4-5 to week 9-11 after the end of estrus)	1 tablet / 15 kg b.w. (from week 4-5 to week 9-11 after the end of estrus)	Daily dosage
60 tablets	30 tablets	40 tablets	Packaging

Name	CARDIOVET	HEMOVET
Species		
Indications	The product is recommended for dogs to support proper function of the heart and the cardiovascular system.	The product is recommended for dogs to support the optimal functioning of blood cells and the hematopoietic system.
Form		
Composition	L-carnitine 540 mg, taurine 200 mg, vitamin E 60 IU, selenium yeast 10 mg	Products from pork blood (as a source of heme iron) 30 mg, glycine chelate of copper (II) (in solid form) 20 mg, vitamin B6 0.6 mg, vitamin B12 5 mcg, folic acid 0.03 mg, vitamin C 30 mg.
Key ingredients	<p>L-carnitine - an amino acid involved in the body's energy processes, playing a crucial role in the transport of fatty acids to the mitochondria, where oxidation and energy production occur. It supports cardiac function and enhances physical exercise tolerance.</p> <p>Taurine - an amino acid essential for the proper functioning of the heart muscle.</p> <p>Vitamin E - a powerful antioxidant that reduces the harmful effects of free radicals on the cell membrane of the heart muscle.</p> <p>Selenium - as a micronutrient is an integral part of the enzyme glutathione peroxidase. Vitamin E together with selenium protects against unwanted contraction of coronary endothelial cells, thus improving blood supply to the heart muscle, but their main function is to counteract the effects of oxidative stress, which is one of the elements of the pathogenesis of dilated cardiomyopathy.</p>	<p>Iron - is essential for the production of hemoglobin and myoglobin in the body (oxygen transport). Heme iron is a highly absorbable form of iron.</p> <p>Copper - is necessary for the transport of iron to the bone marrow, where red blood cells are produced. It influences the proper processes of red blood cell formation.</p> <p>Vitamin B6 (pyridoxal) - is used in the production of heme, the main component of hemoglobin.</p> <p>Folic acid and vitamin B12 - help in the proper production of red blood cells by supporting the division processes of hematopoietic cells in the bone marrow.</p> <p>Vitamin C - is involved in the differentiation of hematopoietic cells in the bone marrow and supports their protection against oxidative stress.</p>
Daily dosage	1 tablet / 15 b.m. twice daily	1 tablet / 10 kg b.w.
Packaging	90 tablets	60 tablets

KALMVET	KALMVET ADVANCED	NEUROSUPPORT	Name
			Species
The product is recommended for dogs and cats to reduce stress and anxiety. The product has a relaxing effect.		The product is recommended for dogs and cats to support the optimal functions of the nervous system. It contains a complex of components with strong antioxidant properties. In older animals, it supports cognitive function and alleviates the effects of aging.	Indications
			Form
dried chamomile (<i>Matricaria chamomilla</i> L.) 80 mg, L-tryptophan 50 mg, valerian root extract (<i>Valeriana officinalis</i> L.) 20 mg.	L-Tryptophan 150 mg, <i>Rhodiola Rosea officinalis</i> L.) 40g, tea extract (<i>Camellia sinensis</i> (L.) O. Kuntze) 20 g	DHA (from fish oil) 64 mg, grape extract (<i>Vitis vinifera</i>) 60 mg, Marigold flower extract (<i>Tagetes erecta</i>) - source of lutein 4 mg and zeaxanthin 1 mg, dried acerola (<i>Malpighia grabla</i>) - source of vitamin C 35 mg, Turmeric curcumin extract (<i>Curcuma longa</i>) 35 mg, Green tea leaves extract (<i>Camellia sinensis</i>) 20 mg, Beta-carotene 10 mg, Taurine 5 mg, Zinc 2.5 mg, Vitamin B12 2.5 mg, Vitamin B3 1.2 mg, Vitamin B5 1 mg, Vitamin A 400 IU, Vitamin B1 0.1 mg, Vitamin B6 0.1 mg, Folic acid 20 mcg, Biotin 10 mcg, Selenium 0.4 mcg, Vitamin E 25 IU	Composition
<p>Tryptophan - increases serotonin levels in the brain and may help reduce aggressive behaviors and stress levels.</p> <p>Camomille - has soothing, calming, and anti-stress effects.</p> <p>Valeriana officinalis - due to its content of valerianic acid, alleviates excessive excitability and has stress-reducing properties.</p>	<p>Tryptophan - increases serotonin levels in the brain and may help reduce aggressive behaviors and stress levels.</p> <p>Valeriana officinalis - due to its content of valerianic acid, alleviates excessive excitability and has stress-reducing properties.</p> <p>L-theanine - may reduce anxiety levels.</p> <p>Rhodiola rosea - improves stress resistance by increasing serotonin levels in the brain.</p>	<p>Curcumin - has strong antioxidant properties.</p> <p>Green tea leaf extract - provides antioxidant action and works synergistically with other antioxidants such as vitamins C, E, and beta-carotene.</p> <p>Grape extract (<i>Vitis vinifera</i>) - affects visual function and reduces oxidative stress.</p> <p>Acerola (<i>Malpighia glabra</i>) - is a source of antioxidants and contains 17 different types of carotenoids (including vitamin C and beta-carotene).</p>	Key ingredients

Indications	The product is recommended for dogs and cats to support non-specific immunity mechanisms. The product can be used in older animals, growing puppies, animals in convalescence, pregnant bitches to optimize the functioning of the immune system.	Vitamin and mineral product for dogs and cats.	Vitamin and mineral product for cats and small breed dogs.
Form			
Composition	Yeast (beta-glucan) 100 mg, CaHMB (calcium β-hydroxy-β-methylbutyrate) 32 mg.	Calcium 100 mg, magnesium 40 mg, vitamin E 6 mg, niacinamide 7 mg, zinc 5 mg, iron 1.5 mg, vitamin B1 1.5 mg, vitamin B12 2 µg, vitamin B2 1.5 mg, manganese 0.4 mg, vitamin B6 1 mg, copper 0.15 mg, vitamin A 200 IU, folic acid 0.1 mg, biotin 0.03 mg, vitamin D3 25 IU.	Calcium 50 mg, magnesium 20 mg, vitamin E 3 mg, niacinamide 3.5 mg, zinc 2.5 mg, iron 0.75 mg, vitamin B1 0.75 mg, vitamin B12 1 µg, vitamin B2 0.75 mg, manganese 0.2 mg, vitamin B6 0.5 mg, copper 0.075 mg, vitamin A 100 IU, folic acid 50 µg, biotin 15 µg, vitamin D3 12.5 IU.
Key ingredients	<p>Beta-glucan – is a polysaccharide obtained from the cell wall of <i>Saccharomyces cerevisiae</i> (yeast) with immunomodulatory properties.</p> <p>HMB-Ca (β-hydroxy-β-methylbutyrate calcium) – is a derivative of leucine that supports the mechanisms of innate immunity.</p>	<p>Intensive Growth Phase Ideal for young animals with increased nutrient demands.</p> <p>Unbalanced or Incomplete Diet Supports those fed home-prepared meals or diets low in vitamins and minerals.</p> <p>Pregnancy & Lactation Helps ensure healthy fetal development and supports the mother's well-being.</p> <p>Recovery & Convalescence Recommended after illness, surgery, or periods of weakness to restore vitality.</p> <p>Vitamin & Mineral Deficiencies Aids in replenishing micro- and macroelement shortages.</p> <p>Senior Animals Enhances overall condition, immunity, and daily vitality in older pets. Simultaneous use with vitamin D2 is not allowed.</p>	
Daily dosage	Dogs and cats < 10 kg b.w. - 1 capsule Dogs > 10 kg b.w. - 1 capsule / 10 kg b.w.	Cats - 1 capsule every other day. Dogs and puppies up to 10 kg b.w. - 1 capsule every other day. Dogs > 10 kg b.w. - 1 capsule / 10 kg b.w.	Cats - 1 capsule daily. Dogs - 1 capsule per 5 kg b.w. daily.
Packaging		60 Twist Off capsules	

Name	RENALVET	RENALVET ULTRA	Name
Species			Species
Indications	The product is recommended for dogs and cats in order to support proper renal function.	The product is recommended for adult cats to support the proper kidney function. The addition of lanthanum carbonate octahydrate reduces phosphorus absorption.	Indications
Form			Form
Composition	Calcium carbonate 200 mg, shellfish meal <i>Chionoecetes opilio</i> (chitosan) 100 mg, vitamin D3 80 IU. Due to the higher content of vitamin D3 compared to complete feed, RenalVet can be administered to dogs and cats at up to 2.5% of their daily food intake.	Lanthanum carbonate octahydrate 150 mg, fish oil (source of omega-3 fatty acids) 150 mg, dried root of <i>Astragalus membranaceus</i> 20 mg, dried horsetail herb <i>Equisetum arvense</i> L. 10 mg, freeze-dried melon juice concentrate (Melofeed) 1 mg	Composition
Key ingredients	<p>Calcium carbonate - has the ability to bind phosphorus present in the diet.</p> <p>Chitosan - supports kidney function in eliminating uremic toxins from the body.</p> <p>Cholecalciferol (vitamin D₃) - helps correct any potential vitamin D deficiencies.</p>	<p>Lanthanum carbonate octahydrate - reduces phosphorus absorption. This compound belongs to the new generation of phosphorus chelators. It is absorbed from the digestive tract to a very small extent, does not accumulate in the body, and does not contain calcium or aluminum.</p> <p>Dried melon juice (Melofeed), as a source of natural antioxidants, supports the health of the body, in particular the digestive and immune system. This ingredient is enclosed in a patented casing that prevents premature digestion in the stomach.</p> <p>Dried horsetail herb <i>Equisetum arvense</i> has a diuretic effect.</p> <p>Dried root of <i>Astragalus membranaceus</i> (a valuable adaptogen) supports the proper kidney function and proper protein filtration.</p> <p>Fish oil is a source of omega-3 polyunsaturated fatty acids (mainly DHA and EPA).</p>	Key ingredients
Daily dosage	Cats and dogs < 10 kg b.w. - 1 capsule Dogs > 10 kg b.w. - 1 capsule / 10 kg b.w.	1 capsule twice a day with meal	Daily dosage
Packaging	60 Twist Off capsules	60 Twist Off capsules	Packaging

Name	URINOVET CAT	URINOVET DOG
Species		
Indications	The product is recommended for cats to support the optimal functions of the urinary system.	The product is recommended for dogs to support the proper functions of the urinary system.
Form		
Composition	Dried cranberry fruit (<i>Vaccinium macrocarpon</i>) 125 mg, glucosamine from animal tissues 84 mg, dried parsley root (<i>Petroselinum sativum Hoffm.</i>) 50 mg, extract of valerian root (<i>Valeriana officinalis</i> L.) 40 mg.	Dried cranberry fruit (<i>Vaccinium macrocarpon</i>) 300 mg, dried parsley root (<i>Petroselinum sativum Hoffm.</i>) 50 mg, glucosamine from animal tissues 50 mg.
Key ingredients	<p>Cranberry extract - is a natural remedy that can help to prevent the formation of urinary tract infections (UTIs). It contains compounds that prevent bacteria from adhering to the walls of the urinary tract, which can reduce the risk of infection.</p> <p>Glucosamine - is a compound that is important for the health of the joints and can help to reduce inflammation in the body. In the context of urinary tract health, glucosamine may help to maintain the health of the bladder lining and support overall urinary tract function.</p> <p>Parsley extract - is a diuretic that increases the urine output, which can help to flush out the urinary tract and prevent the formation of crystals and stones.</p> <p>Valerian extract - can help to reduce stress and anxiety in cats. This can be beneficial for cats with lower urinary tract diseases, as stress can exacerbate symptoms.</p>	<p>Cranberry - reduces bacterial adhesion to the mucous membrane of the urinary bladder.</p> <p>Glucosamine - is a component of the glycosaminoglycan layer of the mucous membrane, protecting it from harmful factors.</p> <p>Parsley - has diuretic properties.</p>
Daily dosage	1 capsule	1 tablet / 10 kg b.w.
Packaging	45 Twist Off capsules	30 tablets

URINOVET CAT DILUTION	VETOSKIN ULTRA	Name
		Species
The product is recommended for cats to support the optimal functions of the urinary system. Contains urine acidifying substances. Do not use with other products or dietary feed with strongly urine acidifying properties.	The product is recommended for dogs and cats in order to multi-directionally support the condition of hypersensitive and atopic skin.	Indications
		Form
Dried cranberry fruit (<i>Vaccinium macrocarpon</i>) 31 mg, glucosamine from animal tissues 21 mg, dried parsley root (<i>Petroselinum sativum Hoffm.</i>) 12.5 mg, 250 mg DL-methionine, vitamin C 75 mg, vitamin B6 3 mg, extract of valerian root (<i>Valeriana officinalis</i> L.) 10 mg, extract of common nettle (<i>Urtica dioica</i> L.) 10 mg.	Micronized palmitoylethanolamide 150 mg, fish oil 100 mg - a source of Omega-3 fatty acids, refined borage oil (<i>Borago officinalis</i>) 100 mg - a source of Omega-6 fatty acids, refined black currant seed oil (<i>Ribes nigrum</i> L.) 100 mg, CurQfen® 30 mg (extract of dried rhizomes of <i>Curcuma longa</i> L. and extract of fenugreek <i>Trigonella foenum-graecum</i> L.), biotin 1 mg, zinc 0.39 mg, vitamin B12 5 mcg, vitamin B2 0.5 mg, vitamin B1 0.27 mg, vitamin B6 0.24 mg.	Composition
<p>DL-methionine - helps lower urine pH.</p> <p>Vitamin C - has antioxidant properties and also lowers urine pH.</p> <p>Cranberry - reduces bacterial adhesion to the epithelial lining of the lower urinary tract.</p> <p>Parsley - has diuretic properties.</p> <p>Valeriana officinalis - has calming, relaxing properties and reduces stress symptoms in cats.</p> <p>Nettle leaf extract - has diuretic effects.</p>	<p>Micronized PEA - supports processes that protect the skin from irritants. It is one of the amides of fatty acids naturally present in the cell membrane, and by participating in the physiological processes of mast cell modulation, it reduces the risk of developing allergic skin diseases.</p> <p>CurQfen® - is a 100% bioavailable and patented form of curcumin; it helps protect skin cells from damage caused by free radicals, improves skin density, and supports its repair processes.</p> <p>Omega-6 fatty acids - are precursors to ceramides present in the skin, which help maintain proper skin function by limiting water loss, providing hydration, improving skin elasticity, and increasing its resistance to damage.</p> <p>Omega-3 fatty acids - support the skin's hydro lipid barrier.</p> <p>Zinc - stabilizes the structure of cell membranes, which is crucial for skin health, and also supports the regenerative processes of the epidermis.</p> <p>The B vitamin complex (B1, B2, B6, B12) and biotin (B7) - support repair processes and the function of the skin's sebaceous glands.</p>	Key ingredients
2 capsules a day (e.g. one in the morning, one in the evening).	Dogs and cats < 15 kg b.w. - 1 capsule Dogs > 15 kg b.w. - 1 capsule / 15kg b.w.	Daily dosage

Name	VETOSKIN SMALL BREED AND CATS	VETOSKIN
Species		
Indications	The product is recommended for small breed dogs and cats in order to maintain optimal skin condition and coat quality. Use in animals with dry skin and dull coat as well as with excessive coat loss.	
Form		
Composition	Blackcurrant seed oil (<i>Ribes nigrum</i> L.) refined 200 mg, borage oil (<i>Borago officinalis</i>) refined (source of omega-6 fatty acids) 50 mg, fish oil (source of omega-3 fatty acids) 50 mg, zinc 0.24 mg, biotin 0.5 mg, vitamin B12 5 mcg, vitamin B2 0.25 mg, vitamin B1 0.1 mg, vitamin B6 0.1 mg.	Borage oil (<i>Borago officinalis</i>) refined (source of omega-6 fatty acids) 145 mg, fish oil (source of omega-3 fatty acids) 145 mg, vitamin B12 5 mcg, biotin 1 mg, vitamin B2 0.5 mg, zinc 0.39 mg, vitamin B6 0.2 mg, vitamin B1 0.2 mg.
Key ingredients	<p>Omega-9 fatty acids - help maintain skin elasticity and prevent dryness.</p> <p>Omega-6 fatty acids - aid in restoring the integrity of the skin's water barrier, prevent excessive water loss, and are components of skin ceramides.</p> <p>Omega-3 fatty acids - exhibit anti-inflammatory effects and ensure the fluidity and elasticity of mucous membranes.</p> <p>Zinc - accelerates the process of epidermal regeneration and wound healing.</p> <p>Biotin - influences the regulation of sebaceous glands—preventing skin oiliness by reducing the amount of sebum produced.</p> <p>B vitamins - are involved in the metabolism of essential unsaturated fatty acids (EFAs) and in the proper functioning of the skin barrier.</p>	<p>Omega-6 fatty acids - prevent excessive water loss from the skin and are components of ceramides.</p> <p>Omega-3 fatty acids - support the skin's hydro lipid barrier.</p> <p>Zinc - stabilizes the structure of cell membranes and supports the regenerative processes of the epidermis.</p> <p>Biotin - affects the regulation of sebaceous gland activity, preventing skin oiliness by reducing the amount of sebum produced.</p> <p>B vitamins - support repair processes and the metabolism of essential fatty acids (EFAs), ensuring the proper functioning of the skin barrier.</p>
Daily dosage	Cats - 1 capsule Dogs - 1 capsule / 5 kg b.w.	Cats & dogs < 15 kg b.w. - 1 capsule Dogs > 15 kg b.w. - 2 capsules
Packaging	60 Twist Off capsules	60 / 90 Twist Off capsules

Name	VETUSSIN	VIEWVET	Name
Species			Species
Indications	The product for dogs supporting the functions of the respiratory tract.	The product containing a complex of antioxidants, recommended for dogs and cats to support the optimal functions of eye.	Indications
Form			Form
Composition	Vitamin A 150,000 IU, tocopherol extracts from vegetable oils 2,500 mg, sodium ascorbate 1,400 mg, flavoring substances (eucalyptus, ivy, thyme, anise) 45,000 mg. *The listed composition refers to 1 liter of the product.	Fish oil 640 mg, extract of grape skin (<i>Vitis vinifera</i> L.) 60 mg, dried acerola (<i>Malpighia glabra</i> L.) 50 mg, extract of green tea (<i>Camellia sinensis</i> (L.) O. Kuntze) 36 mg, extract of dried rhizomes of <i>Curcuma longa</i> L. 35 mg, dried marigold flowers (<i>Tagetes erecta</i> L.) 24 mg – a source of lutein and zeaxanthin, beta-carotene 10 mg, vitamin E 25 IU, taurine 5 mg, vitamin B12 2.5 mcg, niacinamide 1.2 mg, calcium D-pantothenate 1.1 mg, vitamin A 400 IU, vitamin B1 0.1 mg, vitamin B6 0.1 mg, folic acid 0.02 mg, biotin 10 mcg, zinc 2.5 mg, selenium 0.4 mcg.	Composition
Key ingredients	<p>Vitamin A - positively affects the function of the epithelial tissue and, in combination with vitamin C, supports the protective functions of the mucosal barriers in the respiratory tract.</p> <p>Vitamin C - enhances the protective functions of the mucosal barrier in the respiratory tract and is a strong antioxidant.</p> <p>Vitamin E - is a potent antioxidant, supports the proper functioning of the immune system, and benefits the integrity of the epithelial lining of blood vessels.</p> <p>Eucalyptus - has expectorant and soothing effects on the respiratory tract.</p> <p>Ivy - has a muscle-relaxing effect on the smooth muscles of the respiratory tract, easing cough.</p> <p>Thyme - has expectorant properties and soothes cough and irritation in the respiratory tract.</p> <p>Anise - alleviates respiratory tract inflammation, with mild expectorant and soothing effects.</p>	The preparation contains a complex of natural antioxidants , including beta-carotenes, polyphenols, etc., which support protection against the damaging effects of free oxygen radicals. Additionally, the vitamins, minerals, and fatty acids in the preparation support the proper functioning of the visual system.	Key ingredients

Name	GERIATIVET DOG	GERIATIVET DOG LARGE BREED	GERIATIVET CAT
Species			
Indications	Product intended for older dogs supporting proper energy metabolism, performance, and vitality of the body. It contributes to maintaining optimal functioning of joints, bones, muscles, and the immune system.		The product is recommended for cats over 8 years of age. The complex of ingredients contained in the product supports the metabolism of older cats, physical performance of the body and its vitality, proper functioning of the nervous system, reduces oxidative stress in cells, supports proper energy metabolism.
Form			
Composition	CaHMB (β-hydroxy-β-methylbutyrate calcium) 80 mg, yeast (beta-glucan) 75 mg, glucosamine from animal tissues 25 mg, dried marigold flowers (<i>Tagetes erecta</i> L.) 10 mg – source of lutein, L-carnitine L-tartrate 75 mg, vitamin E 5 IU.	CaHMB (β-hydroxy-β-methylbutyrate calcium) 250 mg, yeast (beta-glucan) 150 mg, glucosamine from animal tissues 75 mg, dried marigold flowers (<i>Tagetes erecta</i> L.) 20 mg – source of lutein, L-carnitine L-tartrate 150 mg, vitamin E 15 IU.	Refined black currant seed oil (<i>Ribes nigrum</i> L.) 250 mg, glucosamine from animal tissues 30 mg, taurine 30 mg, DL-methionine 20 mg, vitamin E 5 IU, vitamin B12 5 mcg, biotin 1 mg, vitamin B2 0.5 mg, vitamin B1 0.2 mg, vitamin B6 0.2 mg, extract of common nettle (<i>Urtica dioica</i> L.) 10 mg.
Key ingredients	<p>CaHMB – supports the proper functioning of the immune system.</p> <p>Omega-6 fatty acids – help maintain the integrity of the skin's water barrier, prevent excessive water loss, and are components of ceramides.</p> <p>Beta-glucan – supports the proper activity of the immune system.</p> <p>L-carnitine – an amino acid essential for energy production, supports the function of the heart, brain, and muscles.</p>	<p>Black currant seed oil and biotin – protect and support the regeneration of skin and hair.</p> <p>DL-methionine – ensures optimal urine pH.</p> <p>Extract of nettle leaves – provides support for the lower urinary tract and has antioxidant properties.</p> <p>Vitamin E – positively affects the condition of the skin and coat.</p> <p>B vitamins – support the metabolism of unsaturated fatty acids and the proper functioning of metabolic processes in the body.</p> <p>Taurine – supports the proper function of the heart muscle.</p> <p>Biotin – together with a blackcurrant seed oil plays a crucial role in maintaining healthy skin and coat in cats.</p>

* may contain protein or fats of animal origin

- The doses of active substances used to calculate the dosage of each supplement were applied in experimental treatment on the animal species concerned.
- In the case of Twist-Off supplements, in order to increase the precision of dosage, it is recommended to squeeze the entire contents of the capsule into an "insulin-type" syringe and to administer it directly into the mouth or into food.
- Strictly herbivorous animals should not receive any supplements containing proteins of animal origin.
- Doses for carnivores depend on the animal's body weight.
- The Twist-Off capsule shell is made of bovine gelatine.
