

COSMETICS

product catalogue

SINCE 2008, VET EXPERT HAS BEEN CARING FOR THE HEALTH AND COMFORT OF ALL ANIMALS.

Our mission is to support pet owners and veterinarians in their everyday decisions regarding care and treatment, so that every animal could **look, feel and live the best.**

Vet Expert products are used by veterinarians, breeders and pet parents in over 45 countries on 4 continents.

Our products are manufactured exclusively in laboratories with the highest pharmaceutical quality certificate, GMP (Good Manufacturing Practice), and the production process stages are strictly controlled and supervised. Product compositions are designed in cooperation with veterinary doctors and scientists. The concept of creating products "Based on evidence" guarantees visible results supported by scientific evidence.

Vet Expert portfolio:

- **supplements** for companion animals in an innovative, easy to administer Twist-off Capsule,
- **veterinary diets** - prepared by veterinary dieticians, based only on ingredients that have proven and documented dietary action,
- **maintenance pet food** - natural and balanced feed for pets that stays in harmony with their primeval needs,
- **diagnostic solutions** for dogs, cats, and livestock, supporting veterinarians in making confident decisions in everyday practice,
- **cosmetic & care** line which includes shampoos, wounds healing, ear and dental care, but also odor management.

We are constantly working on new innovations.

NUMBER 1

The result of the survey conducted among veterinarians in Poland unequivocally confirmed Vet Expert's No. 1 position as the undisputed leader in veterinary nutraceuticals.

GLOBAL NETWORK

Our brands - Vet Expert and RAW PALEO are known and appreciated on 4 continents, in over 45 countries around the world and this number is constantly growing.

INNOVATION

As the first ones in the world, we adapted Twist-Off technology among veterinary products for pets.

NON-PROFIT

We support animal-oriented foundations and organizations that look after defenseless and harmed animals.

RESEARCH AND DEVELOPMENT

Our R&D department runs unique projects that shape the future of veterinary medicine. We constantly push the limits and introduce new solutions.

VET EXPERT ACADEMY

Personal growth is very important for every veterinarian. That's why we created our own platform gathering the best key opinion leaders, so everyone in veterinary industry can learn and provide the best service possible.

SKIN & COAT CARE | DERMATOLOGICAL NANOSILVER LINE

Name	CHLORHEXIDINE SPRAY	HOT SPOT SPRAY	ATOPIC SPRAY
Purpose	For topical use to care for skin with bacterial changes, as well as for scratches, abrasions, pustules, vesicles, erosions, and excoriations.	For topical use in the care of sensitive, reddened, and dry skin. Additionally, it can be used for the care of allergic skin.	A topical preparation for the care of sensitive skin, prone to atopy and with a weakened hydro-lipid barrier.
Animal			
Active ingredients	Nanosilver, chlorhexidine (4%), chamomile extract, lanolin, panthenol.	Nanosilver, aloe extract, chamomile extract, panthenol, tea tree oil, salix alba bark extract	Nanosilver, prebiotics, lactic acid, urea, sodium hyaluronate, panthenol, betaine, glycerin and oat protein hydrolysate.
Action	Nanosilver – supports the skin renewal process. In combination with chlorhexidine (4%), they balance the skin microbiome ensuring the health and proper functioning of the skin. Lanolin and panthenol are responsible for optimal skin moisturiation and protect its deeper layers from water loss. The formula is complemented by chamomile extract , known for its soothing properties, which helps to calm and nourish the skin.	Nanosilver – supports skin renewal processes. Tea tree oil – soothes redness, optimizes skin microbiome, and moisturizes. Aloe extract – moisturizes and conditions. Panthenol – a humectant that has soothing and calming properties, supports skin regeneration. Chamomile extract – has soothing and calming effects, improves comfort for irritated skin. Salix alba bark extract – supports natural skin regeneration processes.	Nanosilver – supports skin renewal processes. Prebiotics – ensure a healthy skin microbiome. Lactic acid – supports the production of skin ceramides, making the skin more resistant to damage and external factors, strengthens the hydro-lipid barrier and moisturizes. Urea – protects the skin from TEWL (transepidermal water loss), provides elasticity, soothes skin tension and improves the permeability of the stratum corneum. Betaine and panthenol – soothe irritation and moisturize.
Packaging	100 ml	100 ml	100 ml

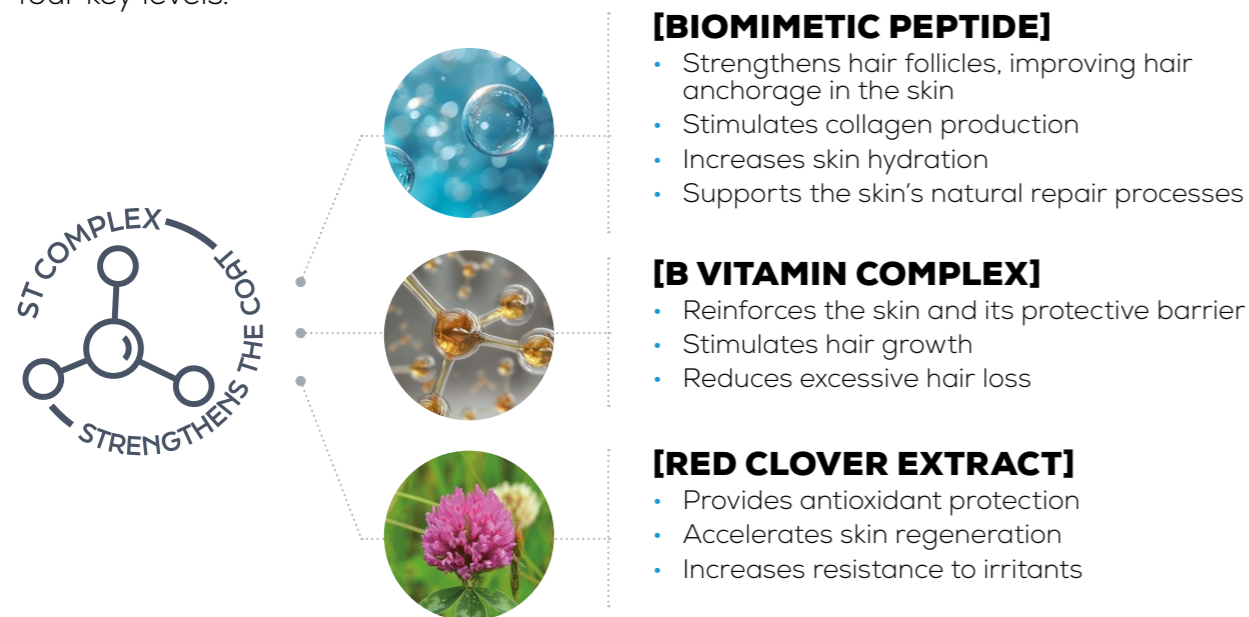

clinicCARE – HYPOALLERGENIC DERMOCOSMETICS SUPPORTING SKIN AND COAT HEALTH

- Created by dermatology experts for dogs and cats.
- Offer effective and safe care, even for pets with the most sensitive skin.

INNOVATIVE ST COMPLEX FORMULA

ST COMPLEX is a unique vitamin-peptide complex that lies at the heart of the Clinic Care line. Its advanced formulation improves the condition of the skin and coat by working on four key levels:

MAXIMUM SAFETY FOR SENSITIVE SKIN

Clinic Care products are designed with even the most delicate animal skin. That's why every formula is:

- Hypoallergenic
- pH-balanced (6.5–7.0)
- Fragrance-free
- Free from SLS and SLES
- Free from artificial colorants

DEVELOPED BY VETERINARIANS

Each product is created based on the latest scientific knowledge and years of clinical experience. All formulas are tested for safety and effectiveness under veterinary supervision.

Name	CLINIC CARE HYPO&OMEGA SHAMPOO	CLINIC CARE HYPO&OMEGA CONDITIONER	CLINIC CARE MICROBIOME BALANCE SHAMPOO	CLINIC CARE MICROBIOME BALANCE CONDITIONER
Purpose	Emollient shampoo for dogs and cats with dry or extra dry skin, prone to flaking (with damaged hydro-lipid barrier)	Emollient rinse-off conditioner for dogs and cats with dry coat and skin. Also excellent for sensitive animals.	For the hygiene and care of dogs and cats with weakened coat and sensitive skin prone to irritation	A probiotic leave-in spray conditioner for the care of animals with weakened fur and sensitive, irritation-prone skin.
Animal				
Active ingredients	ST COMPLEX – A VITAMIN-PEPTIDE COMPLEX that conditions the coat and skin, strengthening their potential on 4 levels : protective, immune, regenerative, regulatory.			
Action	Its formula has been enriched with bioactive olive tree molecules, rich in unsaturated fatty acids: Omega-3-6-9 and vitamin E – Their properties support the reconstruction of the hydro-lipid barrier and the restoration of the proper moisture level, thanks to which they protect the coat and skin from drying out. Linseed oil – provides skin comfort through its deeply nourishing effect. The shampoo's gentle consistency is based on selected natural-origin cleansing ingredients , which softly cleanse skin and coat. The product does not contain SLES and SLS or perfume.	Black seed oil – rich in essential fatty acids omega 3-6-9, vitamins A and E, nourishes while soothing irritations, strengthening the barrier as a "daily shield" of protection.	Prebiotic-postbiotic composition (GOS, FOS, Lactobacillus acidophilus, Lactobacillus casei) – protects the skin and supports the reconstruction of beneficial microflora on its surface. Evening primrose oil – thanks to its soothing and nourishing properties, reduces feeling of discomfort and supports optimal skin functioning. The shampoo's gentle consistency is based on selected natural-origin cleansing ingredients which softly cleanse the skin and coat. The shampoo does not contain SLES and SLS or perfume.	Prebiotic-postbiotic composition (GOS, FOS and Lactobacillus) – protects the skin, rebuilding beneficial microflora on its surface and restoring its natural balance. Baobab extract – thanks to its moisturizing and film-forming properties, reduces damage to the hair structure caused by external factors.
Packaging	250 ml	150 ml	250 ml	150 ml

SKIN & COAT CARE | CARE SHAMPOOS

Name	DETOX CARE PURE WHITE SHAMPOO	DETOX CARE PURE WHITE CONDITIONER	DETOX CARE DEEP DARK SHAMPOO
Purpose	Shampoo intended for the hygiene and care of dogs and cats with light and white coat.	A gentle leave-in spray conditioner, ideal for dogs and cats with white or light-colored coat.	Shampoo intended for the hygiene and care of dogs and cats with dark and black coat.
Animal			
Active ingredients	ANTIPOLLUTION COMPLEX (niacinamide, green tea extract, polysaccharides), argan oil, aloe vera extract, keratin, glycerin.	ANTIPOLLUTION COMPLEX (niacinamide, green tea extract, polysaccharides), pearl extract, glycerin, vitamin E, gluconolactone.	ANTIPOLLUTION COMPLEX (niacinamide, green tea extract, polysaccharides), walnut extract, glycerin.
Action	ANTIPOLLUTION COMPLEX – is the synergy of niacinamide, green tea and polysaccharides, which create triple protection against atmospheric pollution (smog, heavy metals) and free radicals. The addition of argan oil and yellow-tone neutralizing substances , brings out the natural whiteness, and also nourishes and gives the coat shine. The product does not contain SLES and SLS.	ANTIPOLLUTION COMPLEX – is the synergy of niacinamide, green tea and polysaccharides, which create triple protection against atmospheric pollution (smog, heavy metals) and free radicals. The addition of argan oil and yellow-tone neutralizing substances , brings out the natural whiteness, and also nourishes and gives the coat shine. The product does not contain SLES and SLS.	ANTIPOLLUTION COMPLEX – is a synergy of niacinamide, green tea and polysaccharides, which create triple protection against atmospheric pollution (smog, heavy metals) and oxidative stress. The addition of walnut extract enhancing the dark pigment of the coat, bringing out its natural shine. The gentle consistency of the shampoo is based on natural cleansing ingredients that are also mild for sensitive skin. The shampoo does not contain any artificial dyes, or SLES and SLS.
Packaging	250 ml	150 ml	250 ml

SKIN & COAT CARE | CARE SHAMPOOS

Name	DETOX CARE VITALIZING SHAMPOO	DETOX CARE VITALIZING CONDITIONER
Purpose	A shampoo designed for the hygiene and care of all types and colors of dog and cat coat, especially those with a dull coat.	A rinse-out conditioner that makes brushing easier. Suitable for all coat types and colors in dogs and cats.
Animal		
Active ingredients	ANTIPOLLUTION COMPLEX (niacinamide, green tea extract, polysaccharides), aloe vera extract, keratin, panthenol, glycerin, allantoin.	ANTIPOLLUTION COMPLEX (niacinamide, green tea extract, polysaccharides), soybean seed extract, keratin, glycerin.
Action	ANTIPOLLUTION COMPLEX – is a synergy of niacinamide, green tea, and polysaccharides, which create triple protection against atmospheric pollution (smog, heavy metals) and free radicals. Aloe extract provides skin and coat hydration and smoothes the hair, reducing frizz. The shampoo does not contain any artificial dyes, or SLES and SLS	ANTIPOLLUTION COMPLEX – protects the skin and coat from external factors, including air pollution and free radicals. It contains keratin, which strengthens the hair, making the coat strong and less prone to damage. Keratin also seals the hair cuticle, providing a beautiful shine and protection against moisture loss from the deeper layers. Soy seed extract smooths the coat and prevents static, leaving the coat soft. The shampoo does not contain any artificial dyes, or SLES and SLS
Packaging	250 ml	150 ml

DETOX CARE – A NEW DIMENSION OF PET CARE AND HYGIENE THAT PROTECTS SKIN AND COAT FROM THE NEGATIVE EFFECTS OF AIR POLLUTION

UNIQUE ANTIPOLLUTION COMPLEX TECHNOLOGY

The **Detox Care** line is based on the advanced **ANTIPOLLUTION COMPLEX**, which detoxifies and protects the skin and coat against the harmful effects of environmental pollutants:

- [POLYSACCHARIDE]**
 - A natural film-forming agent that protects against environmental pollutants (e.g., smog, heavy metals, dust).
- [NIACINAMIDE]**
 - Strengthens the skin's lipid barrier
 - Improves resistance to external aggressors
 - Moisturizes the skin
- [GREEN TEA]**
 - Has antioxidant properties
 - Promotes regeneration
 - Boosts the skin's immunity against irritants

2-IN-1 CARE

Properly selected pet care should address the individual needs of both the skin and coat. **Detox Care** offers more than just hygiene – it also provides care. The line has a dual action:

- carefully selected active ingredients address the individual needs of the coat, depending on its type.
- The **ANTIPOLLUTION COMPLEX** provides protection against the negative effects of environmental factors.

EFFECTIVENESS CONFIRMED BY STUDIES

The effectiveness of the **ANTIPOLLUTION COMPLEX** ingredients has been confirmed in studies:

- The accumulation of microparticles on the skin was **reduced by 96%** after applying the **ANTIPOLLUTION COMPLEX**, compared to unprotected skin.
- Protection of the coat against free radicals increased by **76%**, reducing the effects of oxidative stress on the hair (dry, thin, and brittle coat).*

*In vivo study – Cosmetic Solabia Group

SAFE FORMULAS, EVEN FOR SENSITIVE ANIMALS

Detox Care products are:

- Free from harmful substances (no SLS, SLES)
- pH-balanced for animal skin (pH 6.5–7)
- Dermatologically tested and proven safe for sensitive animals

Name	REPAIR SHAMPOO	BEAUTY & CARE SHAMPOO	HYPOALLERGENIC SHAMPOO
Purpose	Dermocosmetic regenerating shampoo	Care for animals with sensitive skin, prone to irritation, dryness, or intolerance to other shampoos. Can be used on growing animals.	Care for sensitive skin prone to irritation, allergies, and dryness. Can be used on growing animals.
Animal			
Active ingredients	Horsetail extract, keratin, allantoin, panthenol	Panthenol, allantoin, glycerin	Oat extract, aloe extract, hydrolyzed keratin, lanolin, allantoin, panthenol.
Action	<p>Horsetail extract – a source of silicon compounds that strengthen hair and prevent hair loss.</p> <p>Keratin – rebuilds the hair structure, strengthens, and nourishes it, making it shinier and smoother.</p> <p>Allantoin – soothes, moisturizes, and supports skin health.</p> <p>Panthenol – moisturizes, strengthens the skin, and supports regeneration.</p> <p>The product does not contain SLES and SLS.</p>	<p>Panthenol – accelerates skin regeneration.</p> <p>Glycerin – has strong moisturizing and smoothing properties; supports the skin regeneration process.</p> <p>Allantoin – acts keratolytically and regeneratively, aiding the skin's self-cleansing process by exfoliating dead skin cells.</p> <p>The product does not contain SLES and SLS.</p>	<p>Oat extract – oat proteins are very easily absorbed by the hair and skin, making it more elastic and the hair shiny.</p> <p>Panthenol – has moisturizing and protective effects on the skin.</p> <p>Allantoin – soothes, moisturizes, and supports skin health.</p> <p>Aloe vera extract – has moisturizing and soothing effects, reducing redness and soothing skin irritations.</p> <p>Hydrolyzed keratin – has moisturizing, softening, and smoothing effects on the skin and hair.</p> <p>Lanolin – moisturizes and supports the rebuilding of the lipid barrier.</p> <p>The product does not contain SLES and SLS.</p>
Packaging	250 ml	250 ml	250 ml, Display 20 x 15 ml sachets

SKIN & COAT CARE | DERMOCOSMETIC SPECIAL SHAMPOOS

Name	PUPPY / KITTEN SHAMPOO	ANTISEBORRHOEIC SHAMPOO	BENZOIC SHAMPOO
Purpose	Care for the skin and coat of puppies and kittens.	Care for skin prone to inflammatory conditions of bacterial or fungal origin.	Care for the skin and coat of dogs and cats prone to oiliness.
Animal			
Active ingredients	Aloe extract, laniline, alantoin, panthenol, oat proteins	Chlorhexidine 3%, ketoconazole 1%	Benzoyl peroxide 1.1%, glycerin, panthenol
Action	<p>Ingredients of shampoo such as oat extract and hydrolyzed keratin help enhance skin elasticity and prevent the risk of excessive dryness.</p> <p>Allantoin and aloe vera extract have soothing and regenerative properties.</p> <p>Panthenol – moisturizes and soothes irritated and red skin.</p> <p>Lanolin – an emollient that effectively lubricates and protects the skin from external factors.</p> <p>The product does not contain SLES and SLS.</p>	<p>Chlorhexidine – balances the skin microbiome, ensuring healthy and efficient functioning.</p> <p>Ketoconazole – a substance that maintains the balance of the skin microbiome in dogs.</p> <p>The product does not contain SLES and SLS.</p>	<p>Benzoyl peroxide – regulates sebum production and stabilizes the skin's microbiome.</p> <p>Glycerin – has a moisturizing effect, helping to slow down skin dryness.</p> <p>Panthenol – provides moisturizing effects and supports the skin's protective barrier.</p> <p>The product does not contain SLES and SLS.</p>
Packaging	250 ml	250 ml, Display 20 x 15 ml sachets	250 ml

SKIN & COAT CARE | DERMOCOSMETIC SPECIAL SHAMPOOS

Name	STIMUDERM ULTRA SHORT HAIR SHAMPOO	STIMUDERM ULTRA LONG HAIR SHAMPOO	STIMUDERM ULTRA SERUM
Purpose	Dogs with excessive hair loss of various types and/or with weakened hair.		
Animal			
Active ingredients	Active NTM, panthenol, allantoin, Equisetum arvense extract.	Active NTM, panthenol, allantoin, Equisetum arvense extract, hydrolyzed silk proteins	Active NTM, panthenol, glycerine, hydrolyzed silk proteins
Action	<p>ACTIVE NTM – a patented molecule that induces and extends the anagen phase, improves skin microcirculation and strengthens the hair follicle, thus stimulating hair growth.</p> <p>Panthenol – a humectant, shows a soothing and irritation relieving effect, promotes skin regeneration and accelerates healing.</p> <p>Allantoin – has a keratolytic effect by affecting desmosomes, which are responsible for the intercellular connections of corneocytes. It also has skin moisturizing and irritationsoothing properties.</p> <p>Horsetail extract – rich in minerals necessary for proper skin function (K, Mg, Fe), vitamin C, flavonoids and silica. A natural antioxidant, also known for its conditioning and strengthening properties of the skin and hair.</p>	<p>Ingredients composition adjusted to long – hair needs.</p> <p>ACTIVE NTM – a patented molecule that induces and extends the anagen phase, improves skin microcirculation and strengthens the hair follicle, thus stimulating hair growth.</p> <p>Panthenol – a humectant, shows a soothing and irritation relieving effect, promotes skin regeneration and accelerates healing.</p> <p>Allantoin – has a keratolytic effect by affecting desmosomes, which are responsible for the intercellular connections of corneocytes. In addition, it has smoothing properties, thus improving the appearance of the hair.</p>
Packaging	250 ml	250 ml	150 ml

Name	SPECIALIST SHAMPOO	SPECIALIST MOUSSE	SPECIALIST HEXAWIPES
Purpose	Care for skin prone to inflammatory conditions of bacterial or fungal origin.	Foam shampoo for dry bathing. Intended to cleansing the skin and coat of dogs and cats prone to inflammation of bacterial or fungal	Single-use wipes intended for the cleansing skin prone to inflammation of bacterial or fungal background.
Animal			
Active ingredients	Chlorhexidine 3%, ketoconazole 1%	Chlorhexidine, 0.5%, hexamidine diisethionate, yacon juice	Chlorhexidine 3%, Tris EDTA, hexamidine diisethionate, hyaluronic acid
Action	<p>Chlorhexidine – balances the skin microbiome, ensuring healthy and efficient functioning.</p> <p>Ketoconazole – a substance that maintains the balance of the skin microbiome in dogs.</p> <p>The product does not contain SLES and SLS</p>	<p>Specialist Mousse is a dermocosmetic shampoo with a fragrance-free formula, recommended for use as a complement to the Specialist care line.</p> <p>Chlorhexidine and hexamidine diisethionate – help maintain the skin's microbiome while supporting the creation of an environment that inhibits the growth of microorganisms.</p> <p>Yacon juice – due to its prebiotic properties, supports the maintenance of beneficial skin flora.</p> <p>A complex of panthenol, allantoin and polysaccharides – intensely moisturizes, soothes, and strengthens the hydrolipid barrier.</p> <p>No rinsing required.</p>	<p>3% chlorhexidine and hexamidine diisethionate – balance while creating an environment that inhibits the development of infections.</p> <p>Tris-EDTA – enhances the effect of chlorhexidine.</p> <p>A complex composed of 5 types of hyaluronic acid – has strong moisturizing properties, soothes irritations, and ensures healthy and efficient functioning of the skin.</p> <p>The product ideal for the hygiene and care of areas in dogs and cats, such as: skin folds, around the eyes, ears, muzzle, groin or interdigital spaces.</p>
Packaging	250 ml, Display 20 x 15 ml sachets	150 ml	40 pcs

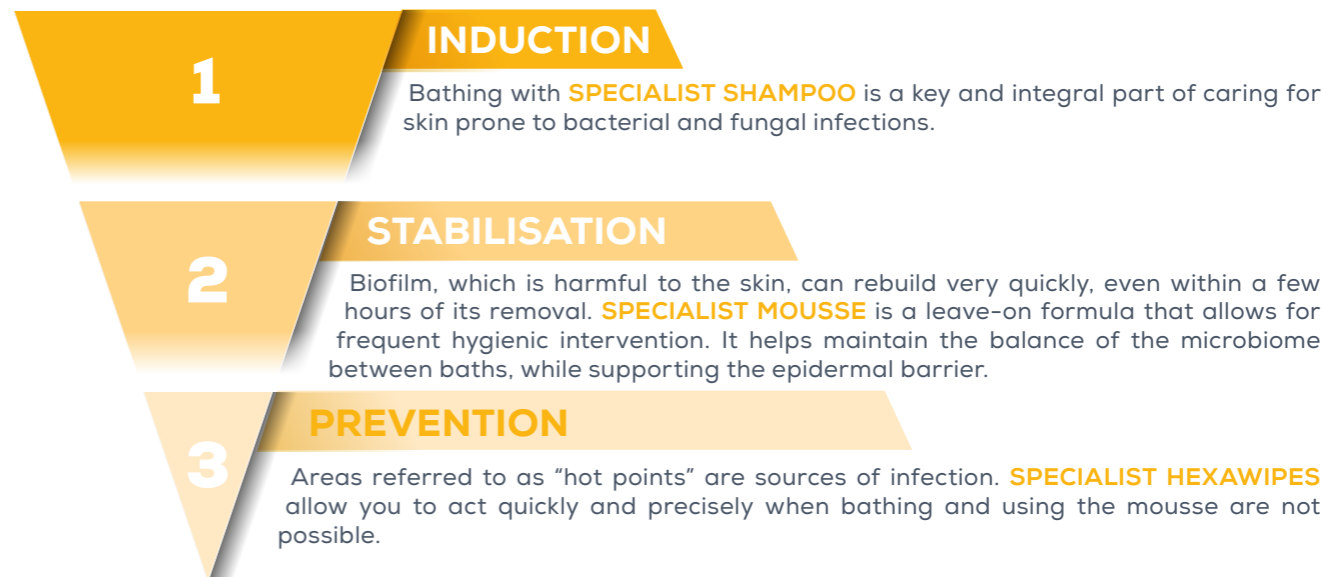

SPECIALIST LINE MEANS:

COMPREHENSIVE SUPPORT AND BIOFILM CONTROL

1. SPECIALIST SHAMPOO is the strongest-acting product, attacking “here and now”,
 2. SPECIALIST MOUSSE SHAMPOO,
 3. SPECIALIST HEXAWIPES.
- provide daily active support and reduce the risk of re-infection;

3 FORMULAS – 3 STAGES OF THERAPY

SPECIALIST SHAMPOO

ROLE AND ACTION

- deeply cleanses the entire surface of the skin and coat by removing sebum, impurities, exudate and biofilm;
- also covers areas (without visible changes), which prevents the spread of infection;
- prepares the skin for the stages of STABILISATION and PREVENTION;
- helps maintain an optimal pH;
- soothes itching and irritation.

DO NOT SKIP THIS STAGE, BECAUSE:

- it is a ‘hygienic reset’, and not bathing hinders overall control of the biofilm and promotes rapid recurrence of infection.

Did you know that...

The combination of water and mild cleansing agents dissolves and removes biological material and microorganisms, allowing the active ingredients (chlorhexidine and ketoconazole) to work together. Such uniform contact over the entire surface is impossible with leave-on formulas.

SPECIALIST MOUSSE

ROLE AND ACTION

- no-rinse cleansing ensures daily biofilm control;
- helps maintain a constant level of active ingredients on the skin;
- covers the entire skin or acts locally, especially in areas with a higher risk (mouth corners, perineal area, etc.);
- helps maintain an optimal pH.

DO NOT SKIP THIS STAGE, BECAUSE:

- without stabilisation, the risk of recurrence increases, with unpleasant odour, itching and local exacerbations often returning;
- helps maintain the effect on days without bathing (also in sensitive or bath-resistant patients).

SPECIALIST HEXAWIPES

ROLE AND ACTION

- prevention of ‘hot points’ that can be a source of infection for larger areas of skin;
- daily care of difficult areas (nose/mouth folds, interdigital spaces, other folds and skin areas, especially in areas exposed to damage or moisture);
- ‘on-the-go’ hygiene;
- skin care around intimate areas (perigenital and perianal).

DO NOT SKIP THIS STAGE, BECAUSE:

- single foci in skin folds and interdigital spaces of the paws are the most common source of re-infection and can undermine the effect of bathing (INDUCTION) and the action of mousse (STABILISATION).

**Veterinary tests conducted for Vet Expert – Specialist Shampoo efficacy after 8 weeks of shampoo therapy conducted by vet. J. Karaš-Tecza

SKIN & COAT CARE | WOUNDS CARE

Name	IRRIGATION LIQUID	HEALING GEL PLUS	ALUHEAL SPRAY
Purpose	Solution for cleansing and rinsing in the treatment of abrasions, cuts, and skin wounds. Prepares the area for further medical procedures	Specialized hydrogel formulation intended to support the natural wound healing process in dogs and cats. It can also be applied to soften and smooth the texture of scarred skin.	Topical product for animals, intended for the protection and care of wounds after surgical procedures.
Animal			
Active ingredients	Hypochlorous acid solution	hypochlorous acid, collagen, glycosaminoglycans, hinokitiol, hyaluronic acid	Aluminum powder, silver citrate, <i>Calendula officinalis</i> extract, hyaluronic acid, silica, betaine, panthenol
Action	Hypochlorous acid (solution) – prepares the skin for veterinary procedures, creates a suitable environment for healing, protects damaged tissue from external factors, and supports its regeneration. Additionally, this ingredient is distinguished by its comprehensive action, high safety potential (biocompatibility parameter), and very rapid action time.	Hypochlorous acid – a natural substance, one of the safest and most effective antimicrobial agents; it provides favorable conditions that promote natural wound healing. Hinoline – a complex of levulinic acid and hinokitiol, which is derived from the Aomori Hiba tree; it ensures the balance of the skin microbiome, has a positive effect on increasing collagen production, and increases the level of hyaluronic acid in the skin (ex vivo studies). Collagen – supports skin renewal and elasticity; it cares for areas with scars, helping to smooth them out. GAG (glycosaminoglycans) – maintain moisture in the skin, soothe and support the protective barrier functions of the epidermis, and reduce the risk of irritation. Hyaluronic acid – hydrates and ensures proper moisture in the wound, thereby more effectively supporting skin regeneration.	Aluminium powder – forms an occlusive layer on the skin's surface (semipermeable). Silver citrate – one of the forms of silver. Known for its soothing and cleansing properties. Calendula officinalis extract – contains substances such as glycosides, flavonoids, phytosterols, mineral salts, and organic acids. It moisturizes the skin, has antioxidant effects, and supports epidermal regeneration. Hyaluronic acid – through its ability to bind water, it forms a protective layer on the skin. Silica – exhibits moisture-absorbing properties. Betaine – has the ability to retain water, which can help moisturize the skin around the wound; it has soothing properties. Panthenol – a humectant that exhibits soothing effects, calms skin irritations, and supports its regeneration.
Packaging	250 ml, 500 ml	30 ml	150 ml

HYGIENE & CARE PRODUCTS | EARS

Name	OTIFLUSH	OTIHELP	EAR CLEANSER	OTICURANT
Purpose	Care preparation for ear canal flushing. Step 1: for use in veterinary practice.	Emulsion prepared for daily ear hygiene at home with antimicrobial properties.	Everyday ear hygiene tonic.	Patented product intended for ear care and hygiene for dogs.
Animal				
Active ingredients	Chlorhexidine, allantoin, urea, salicylic acid, lactic acid, panthenol, glycerin, menthol	Chlorhexidine, menthol, citric acid, panthenol, allantoin, urea, salicylic acid, and glycerin	Allantoin, glycerin, hyaluronic acid, lactic acid, aloe extract, salicylic acid, tea tree oil, mint extract	6-deoxy-L-galactose, oligosaccharide, lactic acid, excipients. Patented formula
Action	Panthenol – acts as a moisturizer and strengthens the protective barrier of the ear skin. Lactic acid – beneficial for maintaining the proper pH balance inside the ear. Urea – softens, moisturizes, and lubricates the ear skin. Salicylic acid – acts as a keratolytic agent. Chlorhexidine – ensures the product effectively removes earwax and impurities. Menthol – cools and refreshes.	Panthenol – moisturizes and strengthens the protective barrier of the ear skin. Urea – softens, moisturizes, and lubricates the epidermis of the ear skin. Salicylic acid and citric acid – act as keratolytic agents. Chlorhexidine – helps the preparation effectively remove earwax deposits and impurities from the ear. Menthol – cools and refreshes the ear.	This is a specialized tonic designed to care for the ears of cats and dogs. It contains allantoin and panthenol , which help to soothe irritations, and glycerine, hyaluronic acid, lactic acid, and aloe extract to moisturize the ear canal. The formula is further enriched with salicylic acid, tea tree oil, and mint extract , which promote ear hygiene.	The preparation binds moisture and helps remove accumulated wax while reducing unpleasant odor. In case of discomfort (e.g., itching), it provides relief. 6-deoxy-L-galactose, oligosaccharide – supports regeneration, stabilizes the environment inside the ear. Lactic acid – supports the production of ceramides (increasing resistance to damage and external factors), has moisturizing properties, and supports the skin's lipid barrier; it ensures proper skin pH, thereby contributing to maintaining the microbial balance. The absorbent properties of the preparation ensure its nurturing function in Oticurant®.
Packaging	125 ml	75 ml	75 ml	24 sachets

HYGIENE & CARE PRODUCTS | EYES & PAWS

Name	EYE CLEANSER	PAW PROTECTION
Purpose	Specialized eye care solution for dogs and cats (including animals with excessive tearing).	Protective paw ointment for cats and dogs.
Animal		
Active ingredients	Hyaluronic acid, lactic acid, bearberry extract (source of arbutin), boric acid, panthenol	Lanolin, paraffin oil, flaxseed oil, panthenol, zinc oxide, nanosilver, tea tree leaf oil, chamomile extract.
Action	<p>Hyaluronic acid – retains water in the deeper layers of the skin and creates a protective layer on the skin.</p> <p>Lactic acid – supports the production of ceramides (increasing resistance to damage and external factors), has moisturizing properties and supports the skin's lipid barrier; ensures proper skin pH, thus contributing to maintaining the proper balance of microorganisms.</p> <p>Bearberry extract – rich in arbutin, has natural brightening properties around the eyes.</p> <p>Fructan – has moisturizing properties and supports maintaining the balance of the skin microbiome around the eyes.</p> <p>Panthenol – has moisturizing and soothing properties. The product does not contain any dyes, and its color is solely due to the presence of natural ingredients.</p>	<p>A lanolin derivative and paraffin oil moisturize and lubricate the paw pads, additionally leaving a protective layer, thereby reducing the risk of damage to the pads from snow, ice, salt, gravel, asphalt, and other surfaces.</p> <p>Linseed oil – nourishes and makes the skin more elastic.</p> <p>Panthenol – moisturizes the epidermis.</p> <p>Silver nanoparticles and tea tree oil – soothe and protect the paw pads.</p> <p>Additionally, tea tree oil has a mild scent and a bitter taste, which discourages the animal from licking the product off the interdigital spaces.</p>
Packaging	100 ml	75 ml

HYGIENE & CARE PRODUCTS | ORAL CARE

Name	STOMAFERIN ULTRA
Purpose	Specialized dental preparation intended for adult dogs and cats. For local application to the mucous membrane of the oral cavity.
Animal	
Active ingredients	Chlorhexidine, lactoferrin
Action	<p>Chlorhexidine – helps to reduce the buildup of bacterial plaque in the mouth; extended action for up to 8-12 hours after application. Reduced adherence to tooth surfaces and a 60% reduction in plaque buildup.</p> <p>Lactoferrin – reduces plaque buildup and also exhibits antioxidant properties. The gel formula and the special thin applicator tip facilitate precise application.</p>
Packaging	30 ml

DUAL ACTION:

- 2 in 1 action on the cause and a problem

GEL EFFICACY AND CONVENIENT APPLICATION:

- gel formula
- application in a closed mouth

ANIMALS' SAFETY:

- doesn't cause excess saliva production in dogs and cats

Name	CARYODENT® PROLIQUA	CARYODENT® FINGER WIPES	CARYODENT® ENZYMATIC TOOTHPASTE
Purpose	The product is recommended for dogs and cats as an additive to drinking water for oral hygiene and dental care.	Single-use finger wipes for mechanical cleaning of teeth and gums of dogs and cats.	Enzymatic, gel toothpaste for dogs and cats for daily oral care. It can be used in growing animals
Animal			
Active ingredients	<i>Ascophyllum nodosum</i> extract, pomegranate extract, inulin, fructooligosaccharides, citric acid, beta-caryophyllene	Cetylpyridinium chloride, oregano oil	β-caryophyllene, prebiotics, glycerin, clove oil, peppermint oil, sage extract, enzymes, hydroxyapatite
Action	<p>Pomegranate extract – helps reduce the accumulation of dental plaque, which is responsible for the formation of tartar; a strong antioxidant.</p> <p>FOS (fructooligosaccharides) and inulin – prebiotics that help maintain the balance of the oral microbiome.</p> <p>β-caryophyllene – a natural ingredient that supports the optimal condition of the oral mucosa and gums (especially for animals sensitive to chlorhexidine).</p> <p>Brown algae extract (<i>Ascophyllum nodosum</i>) – has properties that inhibit biofilm formation and tartar buildup, thus preventing bad breath.</p> <p>Glycerin – moisturizes the oral mucosa.</p>	<p>Cetylpyridinium chloride – organic compound with a broad spectrum of activity supporting the balance of the oral microbiome, which plays a key role in reducing plaque formation. As a result, it helps freshen breath.</p> <p>Oregano oil – as an excellent source of β-caryophyllene, supports the optimal condition of the oral mucosa and gums (especially in animals sensitive to chlorhexidine).</p> <p>Citric Acid – balances the pH of the oral cavity; acts as a gentle tooth whitener.</p>	<p>β-caryophyllene – a naturally derived ingredient; supports the optimal condition of the oral mucosa and gums (especially for animals with sensitivity to chlorhexidine).</p> <p>Prebiotics (inulin, alpha-glucan) – help maintain the balance of the oral microbiome.</p> <p>Glycerin – moisturizes the oral mucosa.</p> <p>Peppermint oil – soothes the oral mucosa and freshens breath.</p> <p>Hydroxyapatite – a compound valued for its range of properties, including remineralization, supporting the restoration of tooth integrity, helping to reduce sensitivity, and limiting bacterial adhesion, which hinders the formation of dental plaque. Additionally, it visually improves the appearance of teeth, making them appear whiter and brighter.</p> <p>Enzymes – help dissolve dental plaque and food debris, thereby preventing the formation of tartar.</p> <p>Sage extract and clove oil – support the healing and regeneration of gums.</p>
Packaging	250 ml	50 finger wipes	50 ml

Name	CARYODENT® ENZYMATIC SPRAY
Purpose	Enzymatic oral hygiene spray for dogs and cats. It can be used in growing animals.
Animal	
Active ingredients	β-caryophyllene, prebiotics, glycerin, clove oil, peppermint oil, sage extract, enzymes, hydroxyapatite
Action	<p>The specialist, adhesive form of the spray allows for maintaining oral hygiene, without the need for daily tooth brushing.</p> <p>β-caryophyllene – a naturally derived ingredient; supports the optimal condition of the oral mucosa and gums (especially for animals with sensitivity to chlorhexidine).</p> <p>Complex of natural enzymes – dissolves existing dental plaque.</p> <p>Prebiotics, beta-caryophyllene – maintain the balance of the oral microbiome.</p> <p>Sage extract – ensures breath freshening.</p>
Packaging	75 g

THE BEST SOLUTION FOR HEALTHY ORAL CAVITY - USE OF BOTH ACTIVE AND PASSIVE HYGIENIZATION METHOD TOGETHER

ODOR MANAGEMENT | ODOR SOLUTION

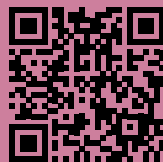

Name	ODOR SOLUTION FRESH SCENT SPRAY	ODOR SOLUTION SPRAY	CAT ODOR SOLUTION SOAKER
Purpose	The product's action is based on a mechanism of binding molecules responsible for unpleasant odors. The technology used, unlike traditional products, does not mask the odor or act enzymatically, but breaks it down permanently and prevents the formation of new ones, thus eliminating even the most persistent and unpleasant smells.		
Animal			
Active ingredients	Product effectively and safely removes unpleasant animal odors.	Product effectively and safely removes unpleasant animal odors. It eliminates every odor, including urine, feces, vomit, necrotic tissue, secretions from anal glands, and others.
